

# Thoughts on Promises

AKA, can we just ship 1.0 already

**#1: We need to support  
the current gUM API.**

**#2: We need to retrofit  
Promises to other APIs (e.  
g. XHR).**

**#3: Ergo (#1 + #2), we can retrofit Promises to gUM.**

**#4: We need to finish 1.0**

**#5: Adding Promises will  
make #4 take longer.**

**#6: Promises will not  
drive adoption of  
WebRTC 1.0.**

**#7: Ergo (#3 -> #6), we  
can and should add  
Promises later.**

**Q.E.D.**
