

1st Int. Workshop on Multilateral/Multiuser Privacy in Pervasive Systems

(<http://www.ihp-microelectronics.com/~langend/MPPS/>)

collocated with

**The Fourth IEEE International Conference on Mobile Ad-hoc and Sensor Systems (MASS)
Pisa, 8 - 11 October 2007 (<http://cnd.iit.cnr.it/mass2007/>)**

The advent of pervasive systems is going to render the precondition made by privacy enhancing technologies researched so far inappropriate. More precisely, in pervasive systems users are no longer interacting with one or just a few entities. Further, sensing devices will be capable to retrieve some data without users consent. In addition, different users may require different settings from a pervasive system at the same time and at the same place, so interference of users has to be solved somehow. Privacy is a hot research topic for several years, but research that addresses privacy in pervasive systems is still in its infancy. The goal of this workshop is to provide a platform for presenting and discussing novel ideas to preserve privacy in pervasive systems. We especially want to foster discussion between scientist from industry and academia working in different fields such as middleware platforms and low power security solutions.

Relevant topics include, but are not limited to:

- Privacy related management of pervasive systems.
- Security means as key enablers for privacy for computing devices with weak resources.
- Information flow analysis.
- Privacy aware applications.
- Privacy preserving middleware approaches.
- Balancing privacy requirements between users and users and service providers.
- RFIDs and privacy.

Paper Submissions

The workshop seeks original research contributions of high quality. In addition to regular papers position papers that discuss hot topics or future research directions, and work in progress papers presenting interesting preliminary results are accepted. Full papers should not exceed 6 pages, and work in progress and position papers should be limited to a maximum of 4 pages. All papers shall be formatted in standard IEEE style, 10pt, two-column pages (style files are available at <http://www.computer.org/portal/site/cscps/index.jsp>). All accepted workshop papers will appear in the MASS 2007 Proceedings published by IEEE. Please refer to the conference web site for details on formatting and to the workshop site for submission instructions.

Important dates

Submission deadline: May 31, 2007

Notification of acceptance: July 15, 2007

Camera ready papers due to IEEE: August 10, 2007

Workshop Chairs:

Prof. Dr. Denis Trcek, denis.trcek@ijs.si

Dr. Peter Langendörfer, langendoerfer@ihp-microelectronics.com

Organizing Committee:

Michael Maaser, Krzysztof Piotrowski, Steffen Peter
