

January 28, 2015 DRAFT

Trying to figure out how to represent the additional capabilities in our in-house social tool. Examples:

Social API Requirements	Boeing potential additions
Content	Content: we have all of what's listed on left, plus the following. Would these be "other content types" or new functionality?
<ul style="list-style-type: none"> • Create content 	
<ul style="list-style-type: none"> <ul style="list-style-type: none"> ○ Image 	
<ul style="list-style-type: none"> <ul style="list-style-type: none"> ○ Text 	
<ul style="list-style-type: none"> <ul style="list-style-type: none"> ○ Video 	
<ul style="list-style-type: none"> <ul style="list-style-type: none"> ○ Audio 	
<ul style="list-style-type: none"> <ul style="list-style-type: none"> ○ Enterprise documents 	
<ul style="list-style-type: none"> <ul style="list-style-type: none"> ○ Other content types 	
<ul style="list-style-type: none"> • Read content created by one user 	
<ul style="list-style-type: none"> • Modify content 	<users only have 1 hour in which to modify>
<ul style="list-style-type: none"> • Delete content 	<users cannot delete content>
...	
	<ul style="list-style-type: none"> • Add tag(s) (metadata)
	<ul style="list-style-type: none"> <ul style="list-style-type: none"> ○ when posting
	<ul style="list-style-type: none"> <ul style="list-style-type: none"> ○ to existing content
	<ul style="list-style-type: none"> • Put security restrictions (3 levels) on content when posting
	<ul style="list-style-type: none"> • Attach a document or video to content
	<ul style="list-style-type: none"> <ul style="list-style-type: none"> ○ Update attachment to new version (sometime later)
	<ul style="list-style-type: none"> • Ask a question
	<ul style="list-style-type: none"> • Post status update (e.g., "tweet")
...	...

There's a lot more. We want to figure out what the best way is to insert our information before I go further.
