This Page Is Valid HTML 4.01 Strict!

Tip Of The Day:

Unordered lists: more than just bullets

The document located at <http://www.w3.org/WAI/EO/2005/Demo/after/> was checked and found to be valid HTML 4.01 Strict. This means that the resource in question identified itself as "HTML 4.01 Strict" and that we successfully performed a formal validation using an SGML or XML Parser (depending on the markup language used).

To show your readers that you have taken the care to create an interoperable Web page, you may display this icon on any page that validates. Here is the HTML you could use to add this icon to your Web page:

```
<p>
  <a href="http://validator.w3.org/check?uri=referer"></a>
</p>
```

If you like, you can download a copy of this image (in [PNG](#) or [GIF](#) format) to keep in

your local web directory, and change the HTML fragment above to reference your local image rather than the one on this server.

If you use [CSS](#) in your document, you should also [check it for validity](#) using the [W3C CSS Validation Service](#).

If you would like to create a link to *this* page (i.e., this validation result) to make it easier to revalidate this page in the future or to allow others to validate your page, the URI is `<http://validator.w3.org/check?uri=http%3A%2F%2Fwww.w3.org%2FWAI%2FEO%2F2005%2FDemo%2Fafter%2F;outline=1>` (or you can just add the current page to your bookmarks or hotlist).

Outline

Below is an outline for this document, automatically generated from the heading tags (<h1> through <h6>.)

- Traffic:
- Today:
- Welcome to CityLights
 - Panda Mating Fails; Vet Takes Over
 - Man Gets Nine Months in Violin Case
 - Lack of brains hinders research
- Elsewhere on the Web
 - Free Penguins
 - More City Parks

If this does not look like a real outline, it is likely that the heading tags are not being used properly. (Headings should reflect the logical structure of the document; they should not be used simply to add emphasis, or to change the font size.)
