The United Humans

an organization, that creates tools and services to enable and protect human digital sovereignty, protect human rights and well-being, make cooperation more effective, transparent and reliable

Who are these slides for?

For investors, developers, and anyone else who is interested to invest, contribute work, or support in any other way the establishment and the development of The United Humans organization and its cooperation tools.

Purpose

The purpose of The United Humans organization is to create and maintain the set of core cooperation tools and services, to enable human digital sovereignty, protect human rights and well-being, make human cooperation more effective, transparent and reliable.

Problem

- Level of cooperation* in human society is not optimal.

- Cooperation is not transparent enough.

- Cooperation is not reliable enough.

- Cooperation is not efficient enough.

- Human rights for privacy and ownership in the digital space are not protected enough.

- Human psychological well-being is abused by the digital tools built on the attention capture and sell business model.

*We use the broadest concept of cooperation. For us cooperation is any activity between 2 or more parties for their common or mutual benefit.

Solution

Digital Sovereignty

- Have ultimate control over your money and digital assets (identity, documents on ownership).

- Make your communication private (end-to-end encrypted).

- Use tools and services designed accordingly to the Humane Design principals (avoid attention abuse and manipulation).

- Be equal peer in any digital relations with humans, organizations or governments.

- Participate in the governance of The United Humans organization (directly or via representation) and in the daily direct distribution of Kudos (money issued based on the count of the unique human identities; used to fund The United Humans operations).

Why Now?

- Emergence of Distributed Ledger Technology – Blockchain.

- Availability of other time-proven technologies that enable Digital Sovereignty (strong cryptography, end-to-end encryption, digital signatures).

- Development of Decentralized Identifier and Verifiable Credentials specifications.

- Rethinking experience and taking into the account mistakes of PGP's Web-of-Trust.

- Rich ecosystem and wide adoption of different products by "crypto" consumers and developers (sign-only hardware wallets, front-end only wallets, s/w libraries, etc).

- Raising interest to privacy (end-to-end encryption) and security.

- Raising interest to human centric products (products that do not abuse human attention and psychology).

- Raising interest to blockchain tokens (crypto-currencies).

Product

The set of core cooperation services to be built and maintained by The United Humans:

- Identity Service – a service to create and manage self-sovereign identities.

- Statements Service – a service to create and sign digital documents that include cryptographically verifiable information.

- Wallet/Payments Service – a service to send and receive Kudos and other money (blockchain tokens).

- Arbitration Service – a service to do arbitration of SURLHI claims (Statement of Unique representation of Living Human Individual on Validbook).

- Mail Service – an end-to-end encrypted email service.

- Chat Service – an end-to-end encrypted chat service.

- Social Networking Service (Validbook) – designed on the principles of Humane Design; a low engaging, non-addictive social networking service focused on capturing the full range of human personality, experiences and relationships. *A* major improvement for users' mental and cognitive well-being as well as for the health of the communities in comparison to the traditional attention trading social networking services.

- Kudos – money (blockchain tokens) that are generated in the amount equal to the total world human population and directly distributed to the digital identities that uniquely represent humans.

Kudos – human's money

Kudos – money (blockchain tokens) that are generated in the amount equal to the world human population, and **daily divided and distributed *only*** to the digital identities that proved to uniquely represent living human individuals.

For example, if on one day in 2018, 1000 identities proved that they uniquely represent humans, then these identities receive at that day ≈7.5 million KDS each (world human population in 2018 ≈ 7.5 Bln humans divided by 1000). This way of Kudos distribution, supports Kudos value, and solves chicken-egg problem of Kudos value at the beginning of The United Humans operations.

Total Kudos supply for the next 100 years = 407,432,205,205,980 KDS ≈ 407 Trillion KDS. These include Total KDS production for the next 100 year - 370,392,913,823,618 KDS and 37,039,291,382,362 KDS of The United Humans Foundational Fund (10% of total production that is directly distributed to humans).

Kudos are used by The United Humans organization to fund its operations.

See world population analysis for the next 100 years at:
https://drive.google.com/drive/folders/1rIaXwT1EldL_uPv8Ue3K6Sh-3WtThnvWAfter first 100 years of Kudos distribution in order to ensure equal opportunity for the next generations amount of Kudos generated per living human individual may increase. To be decided closer to the end of the first 100 years of Kudos distribution.

Funding Model

For the first 10 years, the funds to build and maintain The United Humans cooperation services, will come from the sale of the UH Foundational Fund ≈ 37 Trillion KDS (10% of the total Kudos production directly distributed to humans, for the next 100 years).

The Foundational Fund is going to be sold during the first 10 year of UH operations at the public weekly Kudos sales.

The volume of Kudos to be sold at weekly sales ≈ 71 Bln KDS per week.

Estimated amount in USD to be raised at weekly Kudos sales (≈71 Bln KDS):

- at the first weekly Kudos sales: ≈200,000 USD per sale (estimated KDS price ≈350,000 KDS per 1 USD)
- after the start of the direct daily Kudos distribution to humans: 2 Mln USD – 2 Mln USD per sale (estimated KDS price 350,000–3,500 KDS per 1 USD)
- after the wide adoption of Kudos: 200 Mln – 2 Bln per sale (estimated KDS price 350–35 KDS per 1 USD)

See Kudos price estimates at:
https://docs.google.com/spreadsheets/d/1S91DV39r3QyRkY9opl0W9SkKOnuDQiJ36QIUJKctp7o/edit#gid=0

After UH Foundational Fund is spent, further funding will come from a small (≈0.1%) default transaction fee when transferring money via Wallet developed by The UH organization. (People will be free to opt-out from the Wallet, but its usage will be incentivized by the lottery, reputational gains and an appeal to contribute to the common good – development and maintenance of The United Humans organization).

Development roadmap

- Proof of Concept – done.

  (see at: http://futurama1x.validbook.org/   In order to login as the main test user "Jimbo Fry" download private key at: https://drive.google.com/file/d/1_ZDoXh4aBUQXR50PLRusZRF7XvEY3OQx/view Password to private key file: "123456789". After login go manually to the home page. Use Chrome browser.)

- First production version within 6 - 12 months after the seed investments are raised.

- First Kudos weekly sale within 6 months after the production version release.

- Start of Kudos daily distribution within 1 year after first Kudos weekly sale.

Kudos Presale (Public Seed Investment Offer)

The United Humans organization is doing the presale of 285 Bln Kudos. The price of presale is 1,424,588 KDS for 1 USD.

In order to establish The United Humans organization, build the first production version of its main cooperation tools and start to conduct weekly public sales of Kudos from The United Humans Foundational Fund, we are looking to raise 200,000 USD in exchange for ≈285 Bln KDS (amount of 4 standard weekly Kudos sales). See estimates of potential Kudos price at:
https://docs.google.com/spreadsheets/d/1S91DV39r3QyRkY9opl0W9SkKOnuDQiJ36QIUJKctp7o/edit#gid=0

The ideal investors for the future The United Humans organization would be 10 to 20 natural persons (human individuals) who would make an investments, and by this act, in effect establish The United Humans organization.

If you are interested to invest into The United Humans organization, please write to Bohdan Andriyiv at bohdan.andriyiv@validbook.org

Kudos ownership structure

- Total Kudos production directly distributed to the identities with valid SURLHI (Statement of Unique Representation of Living Human Individual) for the next 100 year = 370,392,913,823,618 KDS ≈ 370 Trillion KDS. (90,91% of total supply)

- UH Foundational Fund = 37,039,291,382,362 KDS ≈ 37 Trillion KDS (10% of the total Kudos production directly distributed to identities with valid SURLHI; 9.09% of the total Kudos supply).

- Total Kudos supply for the next 100 years = 407,432,205,205,980 KDS ≈ 407 Trillion KDS (100% of the total Kudos supply).

- Kudos presale amount ≈ 285 Bln (amount taken from UH Foundational Fund and given to investors in exchange for 200,000 USD of seed investments; 0.07% of the total Kudos supply).

- Founder's Kudos amount ≈ 285 Bln (amount taken from UH Foundational Fund and given to the founder for the initial investments and work; 0.07% of the total Kudos supply).

Team

Founder:

Bohdan Andriyiv: Not a wizard, nor an elf; just a man, who by accident stepped onto the road in search of digital sovereignty. Before the journey, studied economics, biology and programming. Worked in business analysis and software development in the financial industry.

Team:

The fellowship is being gathered. If you would like to join as a developer, a designer, an investor, a thinker or as anyone else, then write to Bohdan Andriyiv at bohdan.andriyiv@validbook.org.

Vision

In five years – a distribution of Kudos established; funding for The United humans organization secured; the first versions of the United Humans core cooperation tools are developed and getting traction in FOSS community; healthy community of SURLHI [1] arbiters and healthy Giant Component [2] of identities with valid SURLHIs is established.

In 15-25 years – kudos distribution, SURLHI arbitration, UH development and operation processes are fully established and time-proved, the set of core cooperation tools are adopted by the most of the Internet users, human digital sovereignty becomes standard and expected feature in any digital relations, human rights in digital space are better protected, products that abuse attention and well-being become less used, cooperation becomes more reliable, transparent and effective.
