Q1

Export as

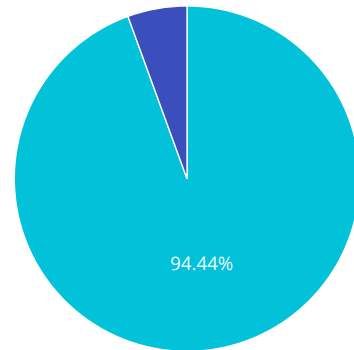

The proposal involves all three of the following decisions:

1. Do not use 'Severity'.

2. Keep 'Serious' as a categorical concept (Yes or No) indicating the potential for one of the serious outcomes defined by FDA and WHO (death, hospitalization or extension of hospital stay, persistent or significant disability or incapacity, life-threatening).

3. Require the use the OpeRational ClassificAtion (ORCA) System within the framework of context/modifying factors.
