# Meeting Cadence (Proposed)

- Monthly general update
  - schedule 1 hour
  - progress reports/updates, aim to go short
- Separate monthly working session(s)
  - schedule ~1.5 hours
  - technical/operational/editorial
    - aim to unblock or progress a next step
  - ~week after general update, with extras as needed?

# Deliverables

- Docs
  - W3C & IETF [Specs](#) for WebTransport extension
  - Tutorials/Getting Started
    - Device naughty/nice lists?
  - Use case sample apps & write-ups
- Implementations
  - Tests, coverage
  - More Platforms
  - Authentication & Encryption
  - MNAT

# Roles & Tasks

- Authoring
- Reviewing
- API Dev & test
- Use case dev

# Next Steps (proposed)

- "Getting Started" Working session(s)?
  - get people up & running
    - receive external traffic via tunnel, internal traffic native
    - enable individual experimentation
  - Interest? can everyone get a linux machine or VM?
    - with docker, X, and binary (or build) from [https://github.com/GrumpyOldTroll/chromium\\_fork?](https://github.com/GrumpyOldTroll/chromium_fork?)
    - Known good: Ubuntu 20 Desktop (willing to try others)
- Reading list?
  - charter & its links?
- Chat venue? (irc.w3.org ok? or discord/zulip/slack preferred?)
- Issue per deliverable?
