PNG WG Meeting Minutes

Jul 10th, 2023

Attendees:

(Alphabetical order, black text means attended, red text means missed.)
Anne van Kesteren
Chris Blume
Chris Lilley
Chris Needham
Chris Seeger
Leo Barnes
Leonard Rosenthol
Pierre-Anthony Lemieux
Said Abou-Hallawa
Theresa O'Connor
Werner Neubrand

Topics & Minutes:

- Can we close GitHub issue 126? Should we first reference "implementation-defined" and add it to the places mentioned in GitHub pull request #172?
- GitHub pull request #321 addresses GitHub issue #158 by detailing the possibility of unused trailing bits at the end of the final IDAT chunk. Any changes requested?
- GitHub issue #323 is a Call for Consensus to publish an updated Working Draft. Once the above two issues are addressed, there are no technical changes left for the Third Edition. An updated Working Draft would put us in a good position for the coming TAG review.
- GitHub issue #320 mentions we should add a test case for ancillary chunks outside ISO 646 A-Z and a-z range. Is anyone interested in taking this on?

Action Items:

- CB to ask for Anne's input on GitHub issue 126.
- PAL to remind on CfC that an open GitHub issue 319 should be considered (and linked in the spec as still-being-resolved).
- CB to work on GitHub issue 320.
