PNG WG Meeting Minutes

Mar 4th, 2024

Attendees:

(Alphabetical order)
Chris Blume
Chris Needham
Chris Seeger
Pierre-Anthony Lemieux
Simon Thompson

Topics & Minutes:

- libpng cICP patch update
  - libpng isn't self-consistent with its handling of different chunks. And color space information is grouped in a way where cICP needs to fit. It took some time to find the best way to handle cICP and hopefully be approved.
  - Will try to land the decoding patch first. Then follow-up with an encoding patch.
- Three ReSpec errors to fix
- Two open pull requests to land
  - These are for Fourth Edition, and so probably shouldn't land just yet
- CL to talk about HDR Still Image Experts Day
  - CL sick today, delaying perhaps until next meeting
- Anything else needed before moving Third Edition on to the next phase?

Action Items:

- CB to work on the ReSpec errors
- CB to follow-up with CL to make sure we have an implementation report ready to go
- CB to figure out meeting link problem / cancellation
- CB to finish cICP libpng patches
